This week Lab Questions to be answered to TA (Oct. 26-28)

1. Do you have regular meetings with your advisor? (0.5 pt)

       Yes,Thursday at 5:30p, unless informed otherwise by advisor.

2. Present your Gantt Chart (from last week) and compare your current state with your initial plans. (0.5 pt)

- Explain how far you have gotten with your milestone goals.

3. Have you encountered any challenges so far which have significantly affected your timeline? (1 pt)

4. For this lab and for the following labs, we expect to see tangible results. Please show us progress in *at least one* of the three topics in order to receive full credit: (3 pts)

1. Software:
   - Code that you've written (tutorials are fine) or
   - Installed IDE (you must have at least introductory knowledge of how to use the environment, such as Android Studio, Arduino IDE, etc.)
2. Hardware
   - You must have at least introductory knowledge of how to use the hardware
3. Design
   - Draw out a prototype of your project(it is recommended to use Computer Aided Design (CAD) over hand-drawn images)
